

Doctor of Philosophy (Ph.D.) dissertations

H.R. Majidi, Failure assessment of notched additively manufactured polymeric components using Energy-based models

Z. Dehghanian, Wave propagation analysis on multilayered orthotropic hyper elastic plates and shells,

Jessica Taylor, Assessment of crack arrest behaviour in modern structural steels, **2021**

K. Minaei, Experimental investigation of fretting fatigue under combined loading and simulating the effect of grain size by crystal plasticity, **2019**

A.Vojdani, Reliability of components operating under creep-fatigue conditions, **2019**

M.S. Ghorashi, Modelling of multi-track laser cladding to evaluate effects of residual stress on fatigue life, **2019**

H. Jafarzadeh, Thermodynamically Consistent Phase Field Modeling of Interaction between Crack Propagation and Phase Transformation, **2019**

K. Reza Kashizadeh, Fatigue Life Estimation of Automotive Steering Knuckle in various maneuvers under constant and variable amplitude loadings, **2018**

Kh. Sherafatnia, Analytical determination of residual stress distribution due to shot peening with considering the effect of initial stresses, **2018**

S.M. Salehi, Life improvement of steel wheel by optimization of repair parameters according to Iranian railway standards **2016**

M. Chamani, Investigation of wear properties of Nano coating through multiscale modelling of Nano scratch test **2016**

M. Azadi, Thermo-mechanical fatigue life prediction model for Aluminum alloy A356.0 with thermal barrier coating **2013**

S.H. Hoseini, Ductile Fracture Modelling Under Reverse Loading, **2012**

N. Habibi, Fatigue Analysis of repaired welded joints, **2011**

S.A. Faghidian, Estimation of Residual Stress Field Using Limited Measurements, **2010**

E. Hosseinian, Material modelling of DIN1.6959 steel and determination of stresses in autofrettaged thick-walled tubes, **2009**

Y. Tadi Beni, Development and Application of Thermo-mechanical ALE Formulation in Simulation of Machining Process, **2009**

A. Fadaee, Impact of Random Residual Stresses on Fatigue Life of Welded Joints **2008**

Gh. Rashed, Multiaxial Stress-Strain Modelling and Fatigue Life Prediction for Drill, K. N. Toosi University of Technology, (Advisor) **2007**

M. A. Hamed, Stress Analysis and Calculation of Strain Energy Release Rate for Composite Beams with Delamination under Mechanical Loads, **2006**
